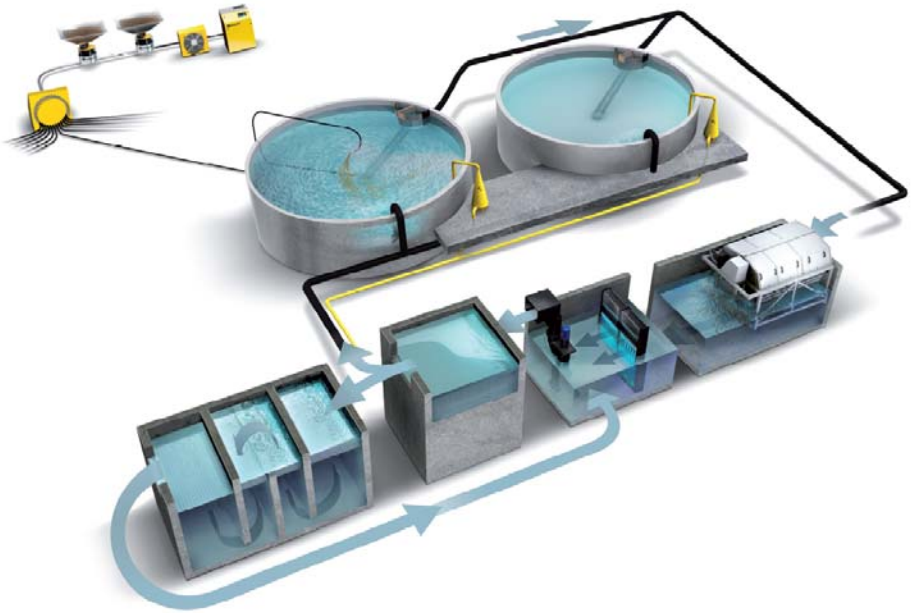
Recirculation

AKVA group - facts

- Leading aquaculture technology supplier
- Supplier with global presence
- Offices in 12 countries
- Consolidated technology knowledge
- Largest supplier to the aquaculture industry



Software Systems

Sensors & Cameras

Feed Systems

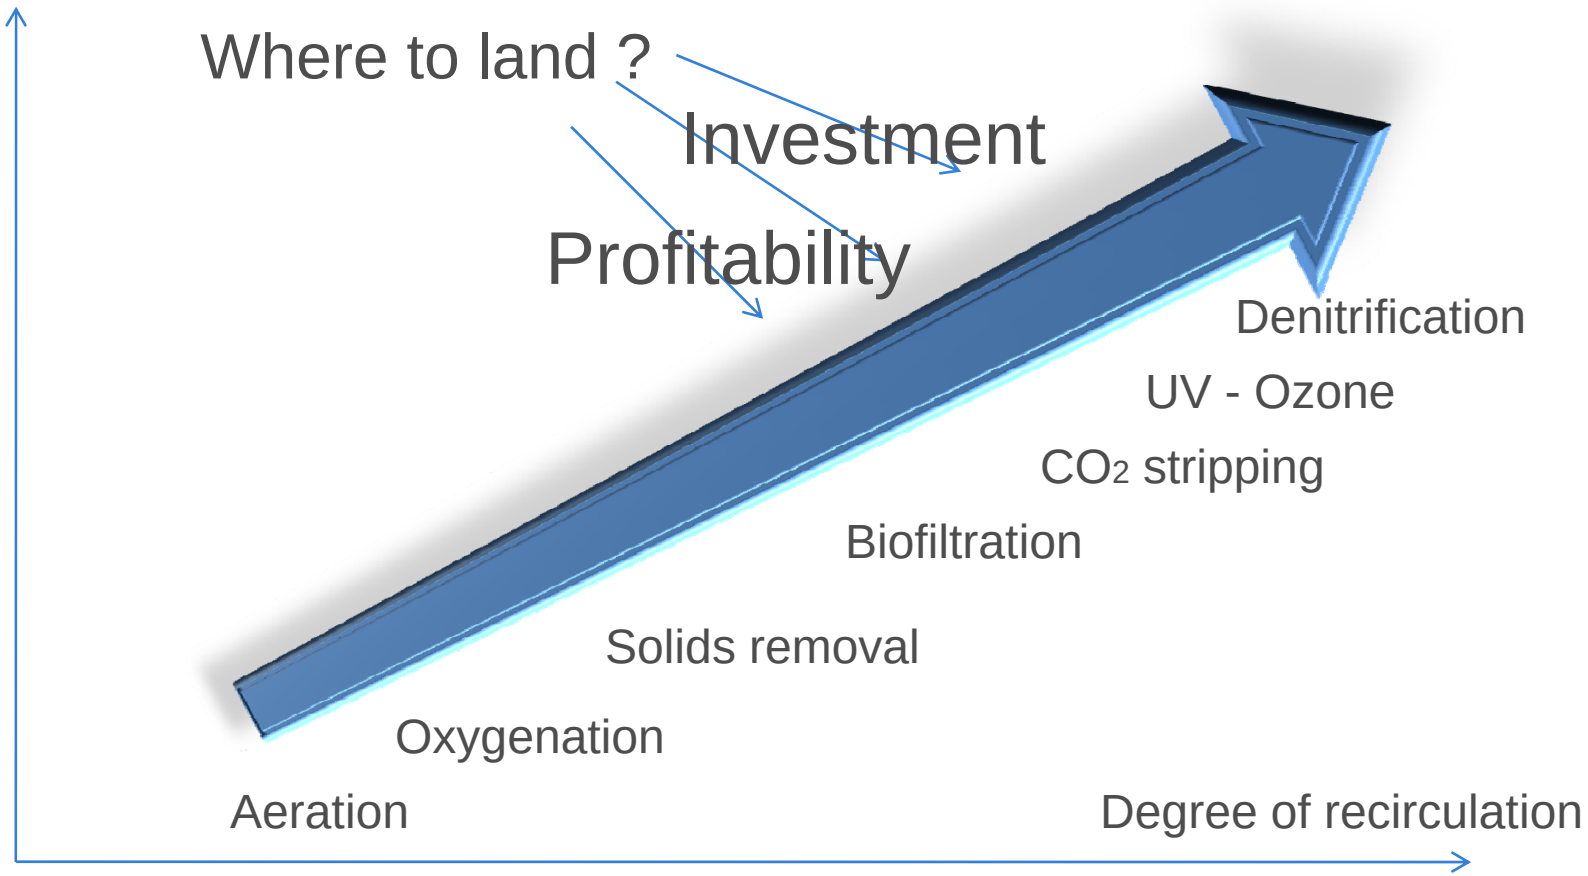
Global possibilities

Developing recirculation

- The Danish model fish farm:
  - 5000 litres of water per kg fish
  - Lower production costs
  - Significant reduction in discharge

- Intensive recirculation systems:
  - 100 litres of water per kg fish
  - High investment cost
  - No discharge to water course

Complexity



0% 50% 100%
