

# The Danish Aquaculture Strategy 2014-2020

**Mikkel Stage, Danish AgriFish Agency**

# ***Aquaculture in Denmark***

Danish production in 2011:

40.454 tonnes

Value: 1.132 mio. dkr  
(= 195 mio US\$)

Unchanged since 2000

Main products:

- Trout: 37.500 t
- Eel: 1.150 t
- Mussels: 540 t

## 4 Objectives (draft)

- Increase total production by 50%
- Increase total value by 100%
- Lower environmental impact per unit by 25%
- Increase export of feed and technology by 200%

## By way of:

- Improve legislation and adm. procedures
- Spatial planning (zones for marine aq.)
- Research, innovation and development
- More technology
- Export strategies and cooperation
- Education
- Product and market development

## Process

- Aug. '13: First draft by interministeriel task force
- Sept. – Oct.: Consultation of main stake holders
- Nov. – Dec.: Public consultation
- Jan. '14: Final draft for political adoption
- March: Final Strategy

## Financial instruments

- European Maritime and Fisheries Fund (Danish Programme)
- "GUDP" (Green Development and Demonstration Programme)
- Other public programmes

# Development trends

- "Off coast" marine aquaculture (1+ nm from coast)
- "Off shore" marine aquaculture (12+ nm from shore)
- Full recirculating systems on land – fresh & salt water
- Organic aquaculture
- Mussels and sea weed to reduce N and P

# Thank you !
